

RiskGuard 365SM

The World's First Affordable, Bundled Cyber Hygiene-as-a-Service Program

Overview

In today's AI-driven threat landscape, cybersecurity tools alone, no matter how robust, can't do it all. Endpoint protection, email gateways, continuous monitoring and backup solutions provide essential safeguards, but they don't monitor themselves. When configurations drift, identities go unmonitored, or vulnerabilities go unchecked, your defenses quietly weaken. RiskGuard 365SM is built to close those gaps without replacing a thing.

RiskGuard 365SM is the industry's first cyber hygiene-as-a-service program designed to maximize the effectiveness of your existing security investments. It acts as a continuous, proactive security safety net, fortifying your current stack by providing real-time oversight, actionable reporting, and expert insights, all at a highly competitive price.

What's Included Each Month

- **Cloud Security Review** – Detect misconfigurations, risky policies, and identity gaps in Microsoft 365 and other platforms before attackers do.
- **Active Directory Security Review** – Identify privilege escalation paths, stale accounts, and misconfigured access, keeping AD hardened and clean.
- **Vulnerability Scanning** – Proactively scan internal and external assets for known risks. Track remediation efforts. Stay audit-ready.
- **Authentication Integrity Review** – Catch weak, reused, or compromised credentials across systems. Validate enforcement of password policies.

Why Organizations Choose RiskGuard 365SM

- **Complements and Enhances Your Existing Tools** - No rip-and-replace required. RiskGuard 365SM adds a powerful oversight layer to your current tech stack.
- **Continuous Cyber Hygiene** - Monthly scans, audits, and reports keep your posture healthy, not just at audit time, but year-round.
- **AI-Era Threat Visibility** - Attackers are using AI, so should your defenses. RiskGuard 365SM's proactive monitoring catches what tools miss.
- **Proven Value. Predictable Cost.** - Unmatched visibility. Zero disruption. One fixed monthly fee.

How We Deliver More (for Less)

RiskGuard 365SM is powered by secured AI-enhanced IP and proprietary automation that reduces manual overhead and streamlines monthly security tasks. This allows us to deliver enterprise-grade oversight at a cost point designed to complement existing IT and MSSP investments.

- Smarter automation, allows for more effective labor costs
- Faster insight, less noise
- Precision-tuned security hygiene that scales

Consolidate Tools. Cut Costs. Boost Protection.

Many organizations already use separate scanning tools, password audits, or cloud reviews, often from different vendors at inconsistent intervals. RiskGuard 365SM consolidates these capabilities into one integrated monthly program for a fraction of the cost.

- Replace scattered solutions with a unified, expert-driven approach
- Save time, reduce vendor management headaches, and cut redundant spend
- Enjoy predictable, fixed monthly pricing that scales with your business

A Market Disruptor with a Mission

RiskGuard 365SM isn't just another security service, it's a market disruptor. Powered by automation, secure AI-enhanced IP, and decades of cybersecurity expertise, we've packaged what used to cost tens of thousands per year into a streamlined monthly service starting at \$595.

At CyberSurv, one of our core values is to bring cutting-edge, affordable solutions to market that make the world more secure. We believe cybersecurity shouldn't be a luxury, it should be accessible, continuous, and cost-effective for all businesses.

EMPOWER. INNOVATE. FORTIFY.
