

CHIEF SECURITY OFFICER AS A SERVICE

GoldSky Security takes a **risk-based approach to security**. It's understood that security is not something that can ever be fully implemented. Therefore, we work with our clients to progress through the security maturity model, building a more secure organization from the ground-up. This progression involves various processes, such as: determining compliance or regulatory requirements; negotiating security requirements with partners; development of policies and procedures; assisting in security-related human resource matters; development of threat models; and more.

KEY BENEFITS TO THE CSOaaSSM SOLUTION

- **SECURITY THOUGHT LEADERSHIP**

A CSO who will enhance thought leadership, provide a third party perspective to appropriately align cyber security strategies with corporate priorities, and enable your company to bring a higher degree of focus, execution, and continuity to your cyber security program initiatives in a highly cost effective manner.

- **ENTERPRISE COLLABORATION**

A CSO who collaborates with all stakeholders from the board level down to the technology, operations, and business management teams to develop the enterprise security vision, strategy, and operations needed to adequately protect information assets and create a cyber security conscious culture.

- **INDUSTRY SPECIFIC EXPERIENCE**

A CSO who will have the proper credentials, skills, and experience that align with the industries you work within and support. This significantly reduces the learning curve related to the applications, architecture design, policy/procedure development, mobile security policies, and compliance frameworks (ex. PCI, HIPAA, privacy, GLBA, etc.) that are deployed throughout your corporate enterprise.

- **EXPAND AND CONTRACT MODEL**

The CSOaaSSM Solution is designed to scale up or down depending on the exact needs of our clients.

about GoldSky's
CSOaaS Solution

"We've come an incredibly long distance in improving our security measures and GoldSky has helped us get there. Not only are we able to get bigger clients that see our certification status, but we also have better processes from which to run our business. Having sustainable business practices is such a critical thing — they're a huge value when they're there and a huge risk when they're not. It feels great to know that we're continuously developing into a really stable and secure company."
